

ABOUT YOGESH ENTERPRISE

Yogesh Enterprise has flourished under the leadership of Mr. Yogesh K. Mehta and the dedication of his son, Mr. Kunal Mehta. Their combined efforts have propelled the company to success across diverse sectors, a journey marked by the trust bestowed by valued customers

We pride ourselves on flexibility, offering supply options in Tapioca and Potato Starch based on demand. Our specialization lies in providing high-speed corrugation machine gum powder and flute laminator gum.

OUR GOAL

Since 1985, our goal has been to advance adhesive technology through innovation, precision manufacturing, and sustainable practices. We are committed to developing high-performance, moisture-resistant adhesive solutions that enhance board strength, improve durability, and reduce glue consumption – delivering both superior quality and cost efficiency. By continuously evolving with industry demands, we aim to provide reliable bonding solutions that seamlessly unite diverse materials while minimizing environmental impact. Our focus remains on exceeding customer expectations, strengthening long-term partnerships, and contributing to sustainable industrial growth.

ENGINEERED FOR PERFORMANCE

Yogesh Enterprise manufactures high-quality industrial adhesives and starch-based bonding solutions designed for demanding industrial applications.

Yogesh Enterprise

Since 1985

“Sticking with you
through every Bond”

INDUSTRIAL ADHESIVES

STARCH & DEXTRIN SOLUTION

Leading Exporters to
Dubai & Africa

Reliable Supply.
Consistent Quality.
On-Time Delivery

INDUSTRIAL FOR PERFORMANCE

Yogesh Enterprise manufactures high-quality industrial adhesives and starch-based bonding solutions designed for demanding industrial applications.

- Moisture-resistant formulations
- High-speed corrugation compatibility
- Strong bonding performance
- Consistent batch quality
- Sustainable manufacturing practices.

“Built to support modern packaging and paper industries”

SCAN TO EXPLORE MORE

INDUSTRIAL ADHESIVE SOLUTION

PAPER CORE ADHESIVE

Specialized bonding solution designed for joining paper layers

- Strength and durability
- Ease of Handling

PAPER CONE ADHESIVE

Designed for strong bonding and sealing of paper cones in textile application

- Efficient winding and handling
- Superior strength and durability

PAPER TUBE ADHESIVE

Specialized adhesive designed for bonding and sealing paper tubes

- Excellent Adhesive properties
- High Strength

ANGLE BOARD ADHESIVE

Specialized glue designed for bonding and securing angle board in packaging

- Excellent Adhesive properties
- Versatility and Compatibility

STARCH & DEXTRIN RANGE

GUM POWDERS

Pasting gum powder

- Premium-quality starch powder for corrugation application
- Excellent water solubility
- Easy application

Corrugation gum powder

- High-grade starch used in corrugation board production
- Superior adhesive strength
- Consistent performance

Neutral gum powder

- Made from high-quality starch for use in the corrugating industry.
- Non-toxic, odorless, and safe for printed paper with no adverse effects.

DEXTRIN

Yellow Dextrin

- Water-soluble carbohydrate derived from starch through controlled heating
- Strong adhesive properties used in glue sticks and gummed tapes

White Dextrin

- White dextrin is a modified starch with strong adhesive properties.
- Used in packaging, textiles, and paper products like envelope gums and stamps.
